REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-7 is the inclusion of a speed detection means for detecting moving speed of the endless belt by generating one pulse per rotation of the driven roller that supports and in correspondence to movement of the endless belt; and a speed control means for controlling a speed of the endless belt based on a detection result from the speed detection means. This is found in all of claims 1-7, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 11-18 is the inclusion of a rotation-count detection means for detecting a rotation-count of the driven rotary body and a speed control means for detecting a rotation of a prescribed first integral count of the driven rotary body with the rotation-count detection means and for controlling the driving rotary body so that the time required for the driven rotary body to rotate at the prescribed first integral count becomes substantially uniform. This is found in all of claims 11-18, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
